MUDASSAR NAEEM

AI SOLUTIONS ENGINEER

+92-329-1630470 | mudassarnaeem19@gmail.com | Lahore, Pk

PROFILE

AI Solutions Engineer bridging complex technical architecture and client delivery. Managed and delivered 150+ AI, SaaS, and automation projects by translating client requirements into actionable technical scopes and leading development teams. Strong hands-on background in LLM integration, RAG pipelines, fine-tuning, and full-stack development.

PROFESSIONAL EXPERIENCE

Client Delivery & Technical Scoping Lead - Freelance/Agency **Jan 2026 - Present**

- Converted client inquiries (Fiverr/Upwork) into orders by conducting scope analysis, gap analysis, and budget-based pitching.
- Translated business requirements into technical scope documents and managed developer hand-offs.
- Supervised development teams via daily stand-ups and quality checks, managing the full project delivery lifecycle.

AI & Full-Stack Developer - Freelance **Oct 2024 - Jan 2026**

- Built and delivered 150+ projects with a team, focusing on AI-powered applications, ML model fine-tuning, and RAG engines.
- Engineered an automated pipeline to generate complete luxury hotel websites in 30-40 minutes using web scraping and LLM content refinement.
- Developed scalable full-stack applications and interactive frontends using modern frameworks.

EDUCATION

Bachelor of Science in Computer Science **Feb 2023 - Jan 2027**
COMSATS University Lahore

PROFESSIONAL SKILLS

- LLM Integration & RAG Systems
- ML Model Fine-Tuning & Prompt Engineering
- Technical Scoping & Gap Analysis
- Client Communication & Sales Pitching
- Next.js, React, Python, Three.js

KEY PROJECTS

- **Refinery Safety Portal:** Built a live incident reporting portal (voice, video, image, text) currently used in production by a major oil refinery.
- **LogicLot AI:** Developed a car auction platform parsing run lists to generate bid recommendations and risk flags using Gemini API and edge functions.
- **Computer Vision Scanner:** Built an ML-powered application (TFLite) to detect date palm leaf diseases and identify peak harvest seasons.
